Test Plan for Facilities Release 1.3

Preparation for Testing

Facilities Release 1.3 and Data Collections ETL (ZADMETL) 1.3 must be applied to your TEST database used to prepare for testing.

Please follow the steps below to prepare for testing the release:

Step 1

Apply Facilities Release 1.3 to the Banner database using the parameters for Fall FT 20232.

Step 2

Setup and/or identify test cases for testing the extraction and editor.

Step 3

In Banner, run the Data Collection Extraction process (ZADMETL) from Banner Job Submission (GJAPCTL). For the Facilities Inventory Data Collection, use 'F' for parameter '01 – Data Collection to Extract?'

Step 4

Turn on the ITS version of GlobalProtect VPN. For download, install, and login instructions, email DW_Test@usg.edu.

Step 5

Run the USG Extract in the TEST environment using the following URL:

<https://appst.ds.usg.edu/ords/f?p=38576>

Step 6

Review the Data Submission Error report to validate changes included in the release in the Cognos TEST environment using the following URL:

<https://analyticst.ds.usg.edu/bi/>

County Location Codes

Purpose

In past collections, some institutions may have experienced issues with the submission of County Location Codes '888' for Out-of-Country and '999' for Out-of-State. ITS identified an issue with logic in the FIDC Campus ETL that was incorrectly collecting some untranslated County Location Codes that start with 'GA' (i.e., 'GA888' and 'GA999').

Functionality delivered with this release:

Facilities Release 1.3 includes modification to the collection logic to correctly collect the following County Location Codes:

- 888 – Out-of-Country
- 999 – Out-of-State

For additional information on County Location Code (BUI008), including instructions for setup in Banner, please see Appendix A: Banner Setup for County Location Codes.

Test Scenario 1:

If your institution has a building that is located Out-of-State or Out-of-Country, assign the applicable County Location Code to the building on the Banner Building Definition (SLABLDG) page. If your institution does not have a building that is Out-of-State or Out-of-Country, you may temporarily change the County Location Code for an existing building that is located in state.

If your institution uses 5 character County Location Codes, such as 'GA888' or 'GA999', you must translate the Banner value to Regents Location Code 888 or 999 on the Banner EDI Cross-Reference Rules (SOAXREF) page using translation label 'RGTCNTY'.

County Location Code	Description
888	Out-of-Country
999	Out-of-State

Run the ZADMETL process for parameter value 'F' to generate output for FIDC. Review the .lis file output for any errors. If ZADMETL completed successfully, run the FIDC extraction.

In Cognos, navigate to Data Collection Review > Table Dump – FIDM Building to review collected building data. Verify that the correct County Location Code is listed in the 'County_Code' column for buildings that are Out-of-State or Out-of-Country.

If you made a temporary change to an in-state building, please change the County Location Code back to the original value.

Testing successful? (circle one) Yes / No

If testing was unsuccessful, please explain issues, in detail, here:

Title

Room Use Codes

Purpose

Room Use Codes are used to identify the primary use or activity for which a room is assigned. The USG Real Estate and Facilities Office has received requests from institutions for a new room use code to identify lactation rooms.

Functionality delivered with this release:

This change includes the creation of Room Use Code '009' for 'Lactation Rooms'. The new code was added to the list of valid Room Use Codes and may be assigned to rooms once the new code is set up in Banner. For information on how to set up a new Room Use Code, please see Appendix B: Banner Setup for Room Use Codes.

Test Scenario 1:

In Cognos, navigate to Reference Tables > FIDM Room Usage Code to view the FIDM Room Usage Code (edw_fidm_room_use_lkp table dump) report.

Verify that the following entry is present in the report:

ROOM_USE_CODE	ROOM_USE_DESCR	ROOM_USE_STATIONS_REQ_IND	FROM_TERM	TO_TERM
009	Lactation Room	N	20232	99999
010	Custodial Area	N	00000	99999
020	Circulation Area	N	00000	99999
030	Mechanical Area	N	00000	99999

Testing successful? (circle one) Yes/No

Test Scenario 2:

Set up Room Use Code '009' on the Banner Room Use Code Validation (ZTVRUSE) page. Assign Room Use Code '009' to an existing room on the Banner Supplemental Room Information page (ZLARSUP) and save the change. Run the ZADMETL process for parameter value 'F' to generate output for FIDC. Review the .lis file output for any errors. If ZADMETL completed successfully, run the FIDC extraction.

In Cognos, navigate to Data Collection Review > Table Dump – FIDM Room to review collected room data. Verify that '009' was collected for the specified room.

Testing successful? (circle one) Yes/No

Test Scenario 3:

In Cognos, navigate to Validation Errors > Validation Error Summary. Verify that the following validation rule did not fire for the room used in Test Scenario 2:

VBRM004: Room use code must be valid.

Change the Room Use Code for this room back to the original value.

Testing successful? (circle one) Yes/No

If testing was unsuccessful, please explain issues, in detail, here:

Title

Validation Rule Updates

Purpose

According to the USG Real Estate and Facilities Office, Program Class Code (BRM005) is not currently used or verified by the system office. As a result, validations related to Program Class Code are not needed and may complicate the collection process for institutions. In addition, changes in validation rules related to Number of Stations were requested to focus station validations on instructional and office spaces where those validations inform analysis.

Functionality delivered with this release:

Validation rules related to Program Class Code (BRM005) have been inactivated. This includes the following validation rules:

- Room Use Code (BRM004)
 - VBRM008 - room use code 010, 020, 030, or 040 must have program class code 90.
- Program Class Code (BRM005)
 - VBRM009 - program class code missing or not numeric.
 - VBRM010 - program class code must be valid.

For data element Number of Stations (BRM006), validation rule VBRM014 was modified to validate only instructional and office spaces where needed for analysis. A new validation was created for room use codes that will no longer be validated under VBRM014. The new and modified validations are as follows:

- Number of Stations (BRM006)
 - VBRM014 - Number of stations must be greater than 0 for room use codes 110, 211, 212, 213 and 310.
 - VBRM016 - Number of stations must be greater than or equal to zero for room use codes 221, 222, 230, 250, 350, 410, 411, 412, 430, 611, 612, 680.

Finally, the Facilities Data Element Dictionary (DED) was updated to document the above changes and improve formatting where needed.

Note for Banner Institutions: Although some validations related to Program Class Code and Number of Stations in the FIDC have been relaxed or inactivated, there may be constraints on related Banner pages that prevent removing or adding invalid values.

Test Scenario 1:

In Cognos, generate a data element dictionary using the Data Dictionary > Download PDF option.

Verify the listed edits to the following data elements:

Room Use Code (BRM004):

- The Validation Rules section should display:
 - Status: Active
 - VBRM004 - Room use code must be valid.
 - Status: Inactive
 - VBRM005 - Room use code 111 must have number of stations less than 51.
 - VBRM006 - Room use code 112 must have number of stations greater than 50.
 - VBRM007 - Room use code 111 or 112 requires square feet per station between 1 and 40.
 - VBRM008 - Room use code 010, 020, 030, or 040 must have program class code 90.
- The Data Source section should display:
 - Provide: Banner
 - Table: ZLRRSUP
 - Column: ZLRRSUP.ZLRRSUP_RUSE_CODE
 - GUI Name: ZLARSUP
 - GUI Label: Rm Use
 - SOAXREF Translation Code:
- The Change History section should display:
 - Academic Term: 20232
 - Change Date: September 9, 2022
 - Change Notes: Inactivated validation VBRM008. Corrected the Data Source Table name and added Room Use Code '009' to the EDW_FIDM_ROOM_USE_LKP table as a valid value.

Program Class Code (BRM005)

- The Business Practice section should display:
 - The Program Class Code field is used to identify the primary functional category of a room. This coding is designed to enhance the financial analysis and budgeting of space allocation, and to support efforts in institutional research and effectiveness.

The USG Program Class Code taxonomy is an adaptation of the NACUBO functional use taxonomy and is also loosely related to OMB Circular A-21 (used to calculate ICR for Federally sponsored activities).

Program Class should be coded in consultation with the Institution's Chief Business Officer and/or other appropriate budget planners and managers to ensure accuracy and analytical utility.

Values and descriptions are maintained within Banner in the Program Class Code Validation Form (ZTVPGCL). ITS maintains valid values.

- The Validation Rules section should display:
 - Status: Inactive
 - VBRM009 - Program class code missing or not numeric.

- VBRM010 - Program class code must be valid.
- The Data Source section should display:
 - Provide: Banner
 - Table: ZLRRSUP
 - Column: ZLRRSUP.ZLRRSUP_PGCL_CODE
 - GUI Name: ZLARSUP
 - GUI Label: Rm Use
 - SOAXREF Translation Code:
- The Change History section should display:
 - Academic Term: 20232
 - Change Date: September 9, 2022
 - Change Notes: Inactivated validations VBRM009 and VBRM010. Corrected the Data Source Table name.

Number of Stations (BRM006)

- The Validation Rules section should display:
 - Status: Active
 - VBRM012 - Number of stations invalid for room use codes 010, 020, 030, 040.
 - VBRM014 - Number of stations must be greater than 0 for room use codes 110, 211, 212, 213 and 310.
 - VBRM016 - Number of stations must be greater than or equal to zero for room use codes 221, 222, 230, 250, 350, 410, 411, 412, 430, 611, 612, 680.
 - Status: Inactive
 - VBRM011 - Number of stations missing or not numeric.
 - VBRM013 - Number of stations required for program class code 11, 12, 13, 52, or 81.
- The Data Source section should display:
 - Provide: Banner
 - Table: ZLRRSUP
 - Column: ZLRRSUP.ZLRRSUP_STATION_NUMBER
 - GUI Name: ZLARSUP
 - GUI Label: Number Stations
 - SOAXREF Translation Code:
- The Change History section should display:
 - Academic Term: 20232
 - Change Date: September 9, 2022
 - Change Notes: Edited validations VBRM014 to include only Room Use Codes 110, 211, 212, 213 and 310. Created VBRM016 for Room Use Codes 221, 222, 230, 250, 350, 410, 411, 412, 430, 611, 612, 680. Corrected the Data Source Table name.

Testing successful? (circle one) Yes/No

Test Scenario 2:

Select a room with Room Use Code 010, 020, 030 or 040. Temporarily change the Program Class Code to a value other than 90. Save the record. Run the ZADMETL process for parameter value F to generate output for FIDC. Review the .lis file output for any errors. If ZADMETL completed successfully, run the FIDC extraction.

In Cognos, navigate to Validation Errors > Validation Error Summary. Verify that the following validation rule did not fire for the room:

VBRM008 - room use code 010, 020, 030, or 040 must have program class code 90.

Change the Program Class Code for the room back to the original value.

Testing successful? (circle one) Yes/No

Test Scenario 3 (Table to Table Institutions Only):

For a selected room, change the Program Class Code to an invalid non-numeric value, such as 'XX'. Run the FIDC extraction and verify that the following validation errors did not fire for the edited room:

VBRM009 - program class code missing or not numeric.

VBRM010 - program class code must be valid.

Change the Program Class Code for this room back to the original value.

Testing successful? (circle one) Yes/No

Test Scenario 4 (Table to Table Institutions Only):

Select a room with room use code 110, 211, 212, 213 or 310. Temporarily change the Number of Stations to '0' (zero). Run the FIDC extraction and verify that the following validation errors did fire for the edited room:

VBRM014 - Number of stations must be greater than 0 for room use codes 110, 211, 212, 213 and 310.

Change the Number of Stations for this room back to the original value.

Testing successful? (circle one) Yes/No

Test Scenario 5 (Table to Table Institutions Only):

Select one or more room(s) with room use code 221, 222, 230, 250, 350, 410, 411, 412, 430, 611, 612 or 680. Temporarily change the Number of Stations to '0' (zero). Run the FIDC extraction and verify that the following validation error did not fire for the edited room:

VBRM016 - Number of stations must be greater than or equal to zero for room use codes 221, 222, 230, 250, 350, 410, 411, 412, 430, 611, 612, 680.

Change the Number of Stations for the room(s) back to the original value.

Testing successful? (circle one) Yes/No

If testing was unsuccessful, please explain issues, in detail, here:

Title

Appendix A: Banner Setup for County Location Codes

The following steps should be used to establish and assign County Location Codes in Banner:

1. Establish / Review County Location Codes on the Banner County Code Validation page (STVCNTY)

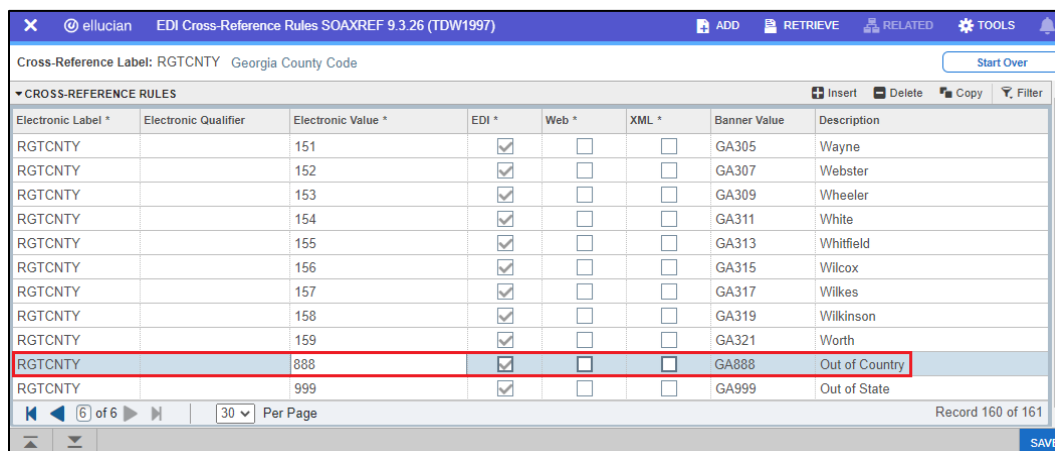

The screenshot shows the Banner County Code Validation (STVCNTY) page. The active filters are set to 'Code: GA%'. The table lists various Georgia counties with their corresponding codes and descriptions.

Code *	Description *	ISO Code
GA001	Appling	
GA003	Atkinson	
GA005	Bacon	
GA007	Baker	
GA009	Baldwin	
GA011	Banks	
GA013	Barrow	
GA015	Bartow	
GA017	Ben Hill	
GA019	Berrien	
GA021	Bibb	
GA023	Bleckley	

Most, if not all, Georgia counties should already be setup on STVCNTY. The County Location Code for Out-of-Country may be set up as 'GA888' or '888' and the County Location Code for Out-of-State may be set up as 'GA999' or '999'. If your institution uses County Codes beginning with 'GA' on the Banner County Code Validation page (STVCNTY), you must translate these codes to valid Regents values on the Banner EDI Cross-Reference Rules (SOAXREF) page.

2. Translate County Codes from the Banner County Code Validation page (STVCNTY) to valid Regents County Location Codes on the Banner EDI Cross-Reference Rules (SOAXREF) page using translation label 'RGTCNTY'.

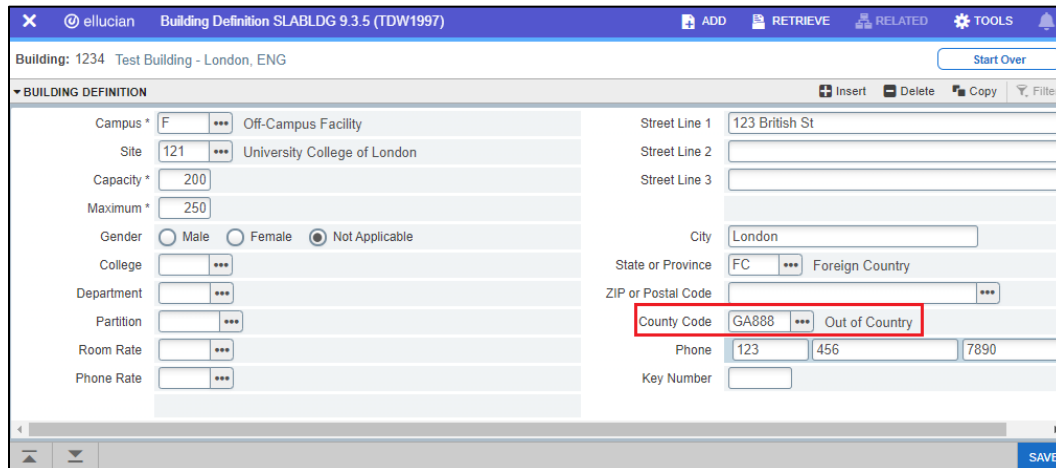

The screenshot shows the Banner EDI Cross-Reference Rules (SOAXREF) page. The cross-reference label is 'RGTCNTY' for Georgia County Code. The table lists various counties with their corresponding codes and descriptions. The rows for 'Out of Country' (GA888) and 'Out of State' (GA999) are highlighted in red.

Electronic Label *	Electronic Qualifier	Electronic Value *	EDI *	Web *	XML *	Banner Value	Description
RGTCNTY		151	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	GA305	Wayne
RGTCNTY		152	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	GA307	Webster
RGTCNTY		153	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	GA309	Wheeler
RGTCNTY		154	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	GA311	White
RGTCNTY		155	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	GA313	Whitfield
RGTCNTY		156	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	GA315	Wilcox
RGTCNTY		157	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	GA317	Wilkes
RGTCNTY		158	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	GA319	Wilkinson
RGTCNTY		159	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	GA321	Worth
RGTCNTY		888	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	GA888	Out of Country
RGTCNTY		999	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	GA999	Out of State

In the example above, Banner value 'GA888' with description 'Out-of-Country' is translated to Regents value (Electronic Value) '888'. For a list of valid County Location Codes, please refer to the FIDM County Code Reference Report in Cognos.

3. Assign County Location Codes to buildings on the Banner Building Definition (SLABLDG) page.

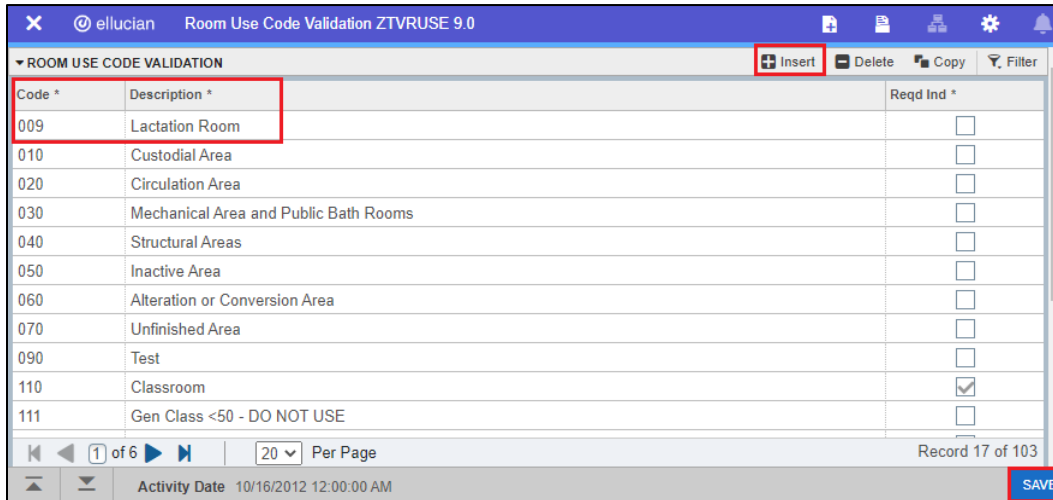

The screenshot shows the Banner Building Definition (SLABLDG) page for building 1234. The form is divided into two columns. The left column contains fields for Campus (F), Site (121), Capacity (200), Maximum (250), Gender (Not Applicable), College, Department, Partition, Room Rate, and Phone Rate. The right column contains fields for Street Line 1 (123 British St), Street Line 2, Street Line 3, City (London), State or Province (FC), ZIP or Postal Code, County Code (GA888), Phone (123, 456, 7890), and Key Number. The County Code field is highlighted with a red box, showing the value 'GA888' and the description 'Out of Country'.

Appendix B: Banner Setup for Room Use Codes

The following steps should be used to establish and assign Room Use Codes in Banner:

1. Establish / Review County Location Codes on the Banner Room Use Code Validation (ZTVRUSE) page.

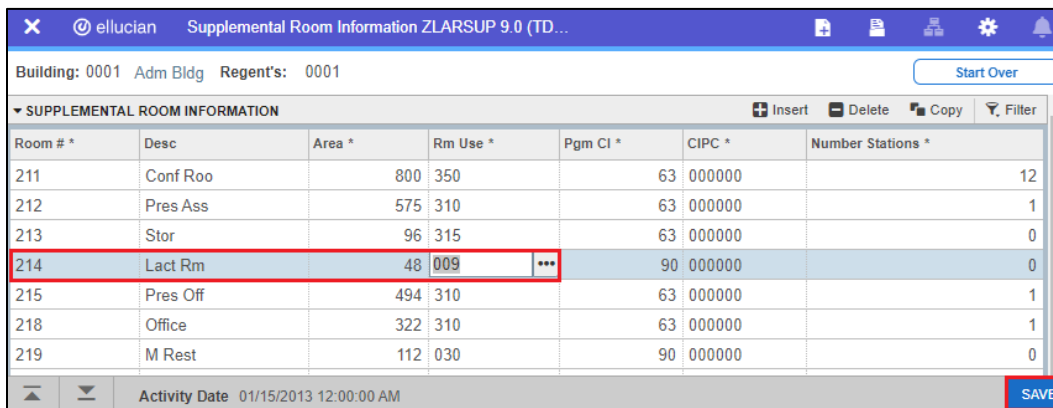

The screenshot shows the 'ROOM USE CODE VALIDATION' window in Banner. The 'Code *' and 'Description *' columns are highlighted with a red box. The 'Reqd Ind *' column contains checkboxes. The 'Insert' button is also highlighted with a red box. The table lists various room use codes and their descriptions.

Code *	Description *	Reqd Ind *
009	Lactation Room	<input type="checkbox"/>
010	Custodial Area	<input type="checkbox"/>
020	Circulation Area	<input type="checkbox"/>
030	Mechanical Area and Public Bath Rooms	<input type="checkbox"/>
040	Structural Areas	<input type="checkbox"/>
050	Inactive Area	<input type="checkbox"/>
060	Alteration or Conversion Area	<input type="checkbox"/>
070	Unfinished Area	<input type="checkbox"/>
090	Test	<input type="checkbox"/>
110	Classroom	<input checked="" type="checkbox"/>
111	Gen Class <50 - DO NOT USE	<input type="checkbox"/>

To add a new Room Use Code, click “Insert” and enter Code ‘009’ with Description ‘Lactation Room’. Click ‘SAVE’. You may now assign the new code to rooms as applicable.

2. Room Use Codes are assigned to rooms on the Banner Supplemental Room Information page (ZLARSUP). To change the Room Use Code of an existing room, enter the new code in the ‘Rm Use’ column for the applicable ‘Room #’. Click ‘SAVE’.

The screenshot shows the 'SUPPLEMENTAL ROOM INFORMATION' window in Banner. The 'Rm Use *' column for room 214 is highlighted with a red box and contains the code '009'. The 'Pgm Cl *' column for room 214 contains '***'. The 'SAVE' button is also highlighted with a red box. The table lists room details including Room #, Desc, Area, Rm Use, Pgm Cl, CIPC, and Number Stations.

Room # *	Desc	Area *	Rm Use *	Pgm Cl *	CIPC *	Number Stations *
211	Conf Roo	800	350		63 000000	12
212	Pres Ass	575	310		63 000000	1
213	Stor	96	315		63 000000	0
214	Lact Rm	48	009	***	90 000000	0
215	Pres Off	494	310		63 000000	1
218	Office	322	310		63 000000	1
219	M Rest	112	030		90 000000	0
